Message from the Director General

The first phase of the new competency based curriculum, with 8 years curriculum cycle was introduced to secondary education in Sri Lanka in 2007 replacing the existed content based education system with basic objective of developing the national level competencies recommended by the National Education Commission.

The second phase of the curriculum cycle to be introduced to grades 1, 6, and 10 starts from 2015. For this purpose, National Institute of Education has introduced a rationalization process and developed rationalized syllabi for these grades using research based outcomes and various suggestions made by different stakeholders.

In the rationalization process, vertical integration has been used to systematically develop the competency levels in all subjects from fundamentals to advanced levels using the bottom up approach. Horizontal integration is used to minimize the overlapping in the subject content and to reduce the content over loading in the subjects to produce more students friendly and implementable curricular.

A new format has been introduced to the teachers' guide with the aim of providing the teachers with the required guidance in the areas of lesson planning, teaching, carrying out activities and measurement and evaluation. These guidelines will help the teachers to be more productive and effective in the classroom.

The new teachers' guides provide freedom to the teachers in selecting quality inputs and additional activities to develop the competencies of the students. The new teachers' guides are not loaded with subject content that is covered in the recommended textbooks. Therefore, it is essential for the teacher to use the new teachers' guides simultaneously with the relevant textbooks prepared by Education Publication Department as reference guides to be more aware of the syllabi.

The basic objectives of the rationalized syllabi and the new format of teachers' guide and newly developed textbooks are to bring a shift from the teacher centered education system into a student centered and more activity based education system in order to develop the competencies and skills of the school leavers and to enable the system to produce suitable human resource to the world of work.

I would like to take this opportunity to thank the members of Academic Affairs Board and Council of National Institute of Education and all the resource persons who have immensely contributed in developing these new teacher guides.

Message from the Deputy Director General

It is a great pleasure to introduce the “Teachers’ Guides” on foreign languages under the curriculum review of 2015. Today, foreign languages have become pragmatically important in internationalization and globalization. Use of different foreign languages in different societies, in fact, eradicates linguistic imperialism of a very few languages.

In the present time, there is a great demand and enthusiasm among people in Sri Lanka to learn languages. In 2015, Chinese, Russian and Korean languages have also been included in the Ordinary Level curriculum, so that students will be able to learn not only Japanese, German, French, Hindi, Pali, Sanskrit and Arabic but also Chinese, Russian and Korean.

This “Teachers’ Guide” has given the guidance to teachers about how learning-teaching process should be taken place to achieve each competency mentioned in the syllabus. The teacher has the freedom to design learning-teaching process according to the syllabus and the instructions given in the “Teachers Guide” to suite the level of the students.

I must be thankful to the group of external resource persons, internal resource persons and the other staff members of NIE who assisted in the preparation of this “Teachers’ Guide”.

Instructions to use Teachers' Guide

Under the new educational reforms of 2007, a new curriculum has been introduced to improve skills of the primary & secondary classes. Thus, arrangements are made to introduce a competency based new syllabus in the German for grade 12 & 13. A competency means, a mixture of knowledge, attitude, talent and personal & social ability. Achieving a competency means, the use of one's own ability, knowledge, attitude in learning and working.

This teacher's Guide could offer you guidance to plan your lesson constructively and prepare your teaching materials prior to the lesson. Each lesson consist of competencies, competency levels, duration, learning outcomes, teaching learning process, evaluation and assessment, vocabulary, materials, and extra activities. In order to achieve a competency, the competency levels are divided as per the contents of subjects based on the time periods of the terms. Each skill which a student will achieve is indicated in the result of special learning. A learning outcome means, a statement of an expected result or ability which a student can prove after completion of the unit of a lesson. The result of learning has marked to observe the accomplishment of the student. The learning outcomes indicate the intended capability of the student after completing the lesson. The teaching and learning process explains the activities of the teacher and the learner. Evaluation and assessment indicate what should be evaluated in the language competency of a student after each lesson. Under vocabulary the new lexicon and expressions of the lesson are listed. Extra activities are mostly communicative activities and games, which can be used to stimulate the interest and creativity of the students.

The assessments can be used to check whether the student has achieved expected result during or at the end of the learning. Accordingly, 6 competencies per syllabus is included for grade 10 & 11. This Teacher's Guide has provided the instructions & system of teaching method per each competency level. The teacher is given the free hand/freedom to organize periods as per each subject matter according to a plan to cover each skill. A proposed teaching method is shown here, in order student to reach the expected results of learning which concerns the skills and skill levels. A method of assessment must be planned by the teacher to check whether the student has reached the expected results of learning.

This Teacher's Guide has provided a common series of instructions covering each skill of syllabus. Considering the proposed activities & instructions, but without limiting to it, the teacher is free to plan lessons using own competency. Also every effort should be made to use the modern techniques & it is important the student should guide to use the internet facilities to gain additional knowledge. In the teaching process, the lesson should be organized considering the student current knowledge, and without limiting to each subject matters & vocabulary only.

German

Syllabus

Grade 10

1.0 Introduction

German, belonging to the Indo-European language family, is spoken by over 100 million native speakers. It is the official language of Germany, Austria and some parts of Switzerland. German is one of the major international languages and is one of the most widely spoken languages in the European Union.

German has been taught in Sri Lanka for well over six decades and is offered as a subject for GCE Advanced Level and Ordinary Level Examinations. University of Kelaniya has been offering Degree Programmes in German for well over two decades. Currently German Studies is offered for the Bachelor at Kelaniya and Sabaragamuwa University of Sri Lanka and of Arts General and Special Degree Programmes at Kelaniya University.

The themes and grammar topics prescribed for Ordinary Level is specified in Appendix I and II of the syllabus. The prescribed text is Kopp & Büttner, Planet, Deutsch für Jugendliche, Heuber, 2004, reprinted by Langers, New Delhi. The contents of this book have been supplemented with some essential grammar and communicative themes in the Teachers' Instruction Manual.

Sound knowledge of German opens many career opportunities for Sri Lankans in the tourism and hospitality trade, travel and airline industry, and provides several avenues for higher education in Germany and German speaking countries. Many graduates with German Studies as a main subject has secured employment in the Ministry of Foreign Affairs and German companies in Sri Lanka.

2.0 Objectives:

- To develop skills in listening, speaking, reading and writing in German
- To learn grammatical structures and patterns of oral and written communication
- To understands aspects of culture and lifestyle of German speaking countries
- To develop learning strategies
- To achieve competency level of A1 of the Common European Framework of Reference (CEFR) for languages

National Goals

The national system of education should assist individuals and groups to achieve major national goals that are relevant to the individual and society.

Over the years major education reports and documents in Sri Lanka have set goals that sought to meet individual and national needs. In the light of the weaknesses manifest in contemporary education structures and processes, the National Education Commission has identified the following set of goals to be achieved through education within the conceptual framework of sustainable human development. The National Education Commission sees the realisation of these goals as its vision for the education system.

- (i) Nation building and the establishment of a Sri Lankan identity through the promotion of national cohesion, national integrity, national unity, harmony, and peace, and recognizing cultural diversity in Sri Lanka's plural society within a concept of respect for human dignity.
- (ii) Recognizing and conserving the best elements of the nation's heritage while responding to the challenges of a changing world.
- (iii) Creating and supporting an environment imbued with the norms of social justice and a democratic way of life that promotes respect for human rights, awareness of duties and obligations, and a deep and abiding concern for one another.
- (iv) Promoting the mental and physical well-being of individuals and a sustainable life style based on respect for human values.
- (v) Developing creativity, initiative, critical thinking, responsibility, accountability and other positive elements of a well-integrated and balanced personality.
- (vi) Human resource development by educating for productive work that enhances the quality of life of the individual and the nation and contributes to the economic development of Sri Lanka.
- (vii) Preparing individuals to adapt to and manage change, and to develop capacity to cope with complex and unforeseen situations in a rapidly changing world.
- (viii) Fostering attitudes and skills that will contribute to securing an honorable place in the international community, based on justice, equality and mutual respect.

(Extracted from : National Education Commission report, 2003)

Basic Competencies

The following Basic Competencies developed through education will contribute to achieving the above National Goals.

(i) Competencies in Communication

Competencies in communication are based on four subsets: Literacy, Numeracy, Graphics and IT proficiency.

Literacy : Listen attentively, speak clearly, read for meaning, write accurately and lucidly and communicate ideas effectively.

Numeracy : Use numbers for things, space and time, count, calculate and measure systematically.

Graphics : Make sense of line and form, express and record details, instructions and ideas with line form and colour.

IT proficiency: Computeracy and the use of information and communication technologies (ICT) in learning, in the work environment personal life.

(ii) Competencies relating to personality Development

- Generic skills such as creativity, divergent thinking, initiative, decision making, problem solving, critical and analytical thinking, team work, inter – personal relations, discovering and exploring ;
- Values such as integrity, tolerance and respect for human dignity;
- Emotional intelligence.

(iii) Competencies relating to the Environment

These competencies relate to the environment: social, biological and physical.

Social Environment : Awareness of the national heritage, sensitivity and skills linked to being members of a plural society, concern for distributive justice, social relationships, personal conduct, general and legal conventions, rights, responsibilities, duties and obligations.

Biological Environment : Awareness, sensitivity and skills linked to the living world, people and the ecosystem, the trees, forests, seas, water, air and life – plant, animal and human life.

(v.) Competencies related to religion and ethics

This fourth set of competencies are laden with values and attitudes. It is essential for individuals to assimilate values, so that they may function in a manner consistent with the ethical, moral and religious modes of conduct, rituals and practices in everyday living, selecting the most appropriate.

(vi.) Competencies in Play and Use of Leisure

Competencies that link up with pleasure, joy, emotions and such human motivations. These find expression in play, sports, athletics and leisure pursuit of many types. These also link up with such values as cooperation, team work, healthy competition in life and work.

Included here are such activities that are involved in aesthetics, arts, drama, literature, exploratory research and other creative modes in human living.

✕:

(vii.) Competencies related to ‘Learning to learn’.

These competencies flow directly from the nature of a rapidly changing, complex and interdependent and crowded world. Whatever one learns, that learning will need updating and review. This requires that one should be aware of, sensitive and skilful in sustained attention, and be willing to persevere and attend to details that matter in a given situation.

- write and engage in a small dialog.

Teaching Learning Process

- Teacher can revise the verbs from the last lesson and instruct to do the exercise 11 (Kursbuch page 15) and then exercise 13 (Arbeitsbuch page 13). Students can work in a pair and collect questions and answers in order to write the mini dialog. After writing it pairs can play it in front of the class without referring the books as in a real life situation.
- Teacher can instruct the students to do the exercise 12 (Arbeitsbuch page 13). Teacher can explain the basics of an E mail. Student can write an answer to the given email.

Evaluation and Assessment

- Student should be able to give basic information about himself freely in a conversation and written.

Vocabulary

Standard phrases of opening and closing of an E Mail

Liebe/ Lieber....., Liebe Grüße/ schöne Grüße, dein/ deine.....

Materials

Kursbuch/ Arbeitsbuch/ CD

Lesson 7

Competency	:	1/3
Competency Level	:	1.1 Listens and identifies speech sounds. 1.2 Practices speech sounds. 3.2 Can use basic phrases and questions satisfactory in familiar situations.
Time	:	2 Periods

Learning Outcome : Students will be able to:
