G.C.E.(O/L) EXAMINATION - 2024 (2025)

Common Techniques of Marking Answer Scripts.

It is compulsory to adhere to the following standard method in marking answer scripts and entering mark sheets.

1. Each Assistant Examiner should use red colour ball-point pen for marking answer scripts.
2. A purple colour ball-point pen should be used by Chief Examiners.
3. Code number of the Assistant Examiner should be noted down on front page of each answer script. Enter marks in **clear numerals**.
4. Write off incorrectly written numerals with a clear single line and authenticate the alterations with Examiner's initial.
5. Enter the marks of each subsection of a question as a rational number in the given space of Δ and the final marks of each question should be entered as a total rational number in the given space of \square by denoting respective question number as well. Use the column assigned for the Examiners to write marks.
6. Evaluation Mark Finalizer should use blue or black colour pen to verify the accuracy of the marks.

Example: Question No. 03

(i)		✓	$\Delta \frac{4}{5}$
(ii)		✓	$\Delta \frac{3}{5}$
(iii)		✓	$\Delta \frac{3}{5}$

03 (i) $\frac{4}{5}$ + (ii) $\frac{3}{5}$ + (iii) $\frac{3}{5}$ =
 $\frac{10}{15}$

MCQ answer scripts: (Template)

1.
 - i. Mark the correct options on the template according to the Marking Scheme.
 - ii. Cut off the marked windows with a blade.
 - iii. Cut off the cages for Index Number and the number of correct options so as to be able to keep the template correctly on the answer script.
 - iv. Cut off a blank space to the right of each options column to mark the answers.
 - v. Cut off the cages for the subject number and the subject to be clearly visible.
 - vi. **Submit the prepared template to the Chief Examiner for approval.**

2. Then, check the answer scripts carefully. If there are more than one or no answers marked to a certain question write off the options with a line. Sometimes candidates may have erased an option marked previously and selected another option. In such occasions, if the erasure is not clear write off those options too.
3. Place the template on the answer script correctly. Mark the right answers with a '✓' and the wrong answers with a 'X' against the options column. Write down the number of correct answers inside the cage given under each column. Then, add those numbers and write the number of correct answers in the relevant cage.

Structured essay type and essay type answer scripts:

1. Cross off any pages left blank by candidates. **Underline wrong or unsuitable answers and write cross mark. Point-out areas by a check mark, where marks can be offered.**
2. Use the right margin of the overland paper to write down the marks.
3. Write down the marks given for each question against the question number in the relevant cage on the front page in **two digits**. Selection of questions should be in accordance with the instructions given in the question paper. Mark all answers and transfer the marks to the front page, and write off answers with lower marks if extra questions have been answered against instructions.
4. Add the total marks carefully and write in the relevant cage on the front page. Turn pages of answer script and add all the marks given for all answers again. Check whether that total tallies with the total marks written on the front page.

Preparation Of Mark Sheets.

Except for the subjects with a single question paper, final marks of two papers will not be calculated within the evaluation board. Therefore add separate mark sheets for each of the question paper. Enter paper I marks in "Total Marks" column of the mark sheet and write them in words as well. Enter paper II Marks in the "Total Marks" Column and include the relevant details. For the subject 43 Art, Paper I, II and III Marks should be entered numerically in the separate mark sheets and **should also be written in words**.

For subjects 21 Sinhala language and literature and 22 Tamil Language and literature, paper I marks once entered numerically should be written in words. Use separate marks sheets for the papers II and III and enter the total marks in the "Total marks column". Write the relevant detailed marks against each of the total mark.

N.B.:-

- I. **Final marks for paper I, paper II or paper III should always be rounded up to the nearest whole number and they should never be kept as decimal or half values.**
- II. **Each page of the mark sheet should be compulsorily verified by the Assistant Examiner who entered marks to the mark sheet, Assistant Examiner who checked the mark sheet, the Verifying Examiner of the evaluation marks and Chief Examiner by placing respective code number and the signature.**

G.C.E. (Ordinary Level) – 2024 (2025)**Paper I - Art****Learning Outcomes**

1. Understanding the theories and techniques gained through practical exercises as well as testing and measuring nurtured skills.
2. Exploring the craftsmanship of traditional art industries, aesthetic methods, use of raw materials and cognitive ability of related areas
3. Identify the universal artists and their works of art and measure their ability to evaluate and appreciate their background, media usage, subject matter, techniques and expressions.
4. Skills exploration of the cultural background of classical art creations related to Sri Lanka, India and Europe.

Art, Question Paper 1 is designed to answer the same question paper. This paper containing 40 questions should be marked in red with correct answer (✓) mark and incorrect answer mark (✗) mark. It is easy to make right and wrong marks first on each question number. If the candidate does not answer a question, draw a red line on the dotted line of the question and mark (✗) it as incorrect.

The questions contained in the question paper are arranged in different patterns. It consists of question patterns that combine answers with photos, fill in the blanks, fill in the blanks, compare a group of photos to each other in relation, create meaningful sentences and evaluate artwork. The nature of a question paper is that there are very easy questions as well as gradually deepening questions in the content of the syllabus. The assumption that all the candidates who complete the syllabus and appear for the examination have studied the content of the syllabus and reached the desired objectives and skills has become a major factor in preparing the question paper. Whether or not students encounter such conditions depends on the learning-teaching process in the classroom. We strongly emphasize the importance of nurturing students with subject knowledge so that they can face any challenge instead of being taught how to answer the question paper according to a certain pattern.

Many questions in the question paper can be answered objectively and include questions to be answered in essay form. Provides an opportunity to write a meaningful sentence that clearly expresses the meaning of any terminology word or theory. The meaning of the word given by the candidate should be very clear. This means measuring the essay and expression ability of students studying art.

Questions numbered 36 - 40 are also designed to provide such free answers. Candidates have the opportunity to answer as freely as they know and enjoy. Yet there have been instances where candidates have written about what they see in the work of art without recognizing it. Evaluation is the process of recognizing, appreciating, and critically analyzing a work. It would not be an appreciation to consider a work of art as a material object and to interpret what is seen in it. In answering this question, there are five objectives that have been provided to provide an approach to a proper evaluation. It is also expected to provide a complete sentence. So, avoid giving marks for answers provided in a single word.

First of all, the candidate should be satisfied that he has identified the artwork. It is important that the candidate is able to identify the given work of art as it is directly related to the content unit of the syllabus. Accordingly, it is necessary to write five sentences clearly under the sub-headings given that the theme, technique, craftsmanship, emotional feelings, etc. are explained. The sentence should make clear the intended meaning of the subtitle of the work of art. These answers are not objective and should take the form of essays, so be careful when awarding points.

Practical papers II and III are more likely to be anomalies while judged with 30 marks. It is best to consider marking with the paper, if this can be considered as %100, it will be easier to determine the marks of the answer sheet correctly.

It is important to think of it as a percentage when deciding on a score of 30. The table below will make it easier to determine what percentage of the mark you will award.

Paper II**Free line drawing and color graphic composition****Learning Outcomes :**

1. Assessing the ability to understand the nature and shape of natural and artificial objects, and the ability to apply theories and use techniques.
2. Measuring the ability to express and summarize objects' properties using line media.
3. Measurement of the ability to use color as the techniques of color use and the characteristics of objects emerge.

two practical answers are provided by the candidates for the paper ii. One is a study done by lines and the other is a color drawing. Both of these paintings should be evaluated. The first criterion in the scoring procedure should be used for line study.

Line study

This is intended to lead to a basic study of the group of objects that the candidate has in front of him. Although some have understood this and studied the shape of the material separately, some candidates draw a line drawing of that group of materials. This line study, however, should reflect the skill of manipulating the line. Accordingly, the candidate should be considered for the skill displayed on the line and the score (according to the 1st criterion) should be determined out of the five (05) marks required for it.

Color drawing

It is expected to color and finish a realistic picture with the help of the material group. For this, marks should be determined under the relevant criteria while awarding marks. Under each of the criteria, please determine the marks that the candidate has reached to determine how far he has come. Here the painting should not be evaluated according to one's taste and the evaluation should be done based on understanding the skills displayed by the candidate.

Scoring criteria

- | | |
|--|------------|
| 1. Line study | -05 Marks |
| 2. Ability to meaningfully configure the material group on a plane | - 05 Marks |
| 3. Ability to express the scale and nature of materials | - 05 Marks |
| 4. Understanding theoretical application
(Perspective, 3D features, eye level, space usage) | - 05 Marks |
| 5. Color usage and characteristics | - 05 Marks |
| 6. Overall finish including the background of the painting | - 05 Marks |

Total marks for the question paper = 30 Marks

Paper III. - Part I – Art composition**Learning Outcomes:**

Evaluate the creative skill and taste development skills of expressing the experiences gained in nature as well as the created environments and objects in nature and the events and processes that take place in them through graphical language.

Candidates display different levels of skill in publishing selected topics. This is where instances of minimal manipulation as well as maximum skill in line manipulation and format expression as well as instances of human figure manipulation are found.

Candidates who have mastered the use of color and the use of a variety of techniques, and who have not nurtured practical skills. Therefore, it is necessary to identify the level of practical skills shown by each candidate and award marks based on the criteria accordingly. Please award points regardless of personal preference.

Scoring criteria

- | | |
|--|-------------------------|
| 1. How the appropriate context and environment are expressed in the expression of the chosen topic | -05 Marks |
| 2. How all the shapes, including human figures, are summarized on the plane by line shapes | -05 Marks |
| 3. Understanding the use of theories
(Scale, perspective, 3D features, eye level and space usage) | -05 Marks |
| 4. Demonstrated skill in the use of color | -05 Marks |
| 5. The stylistic and overall finish that followed | -05 Marks |
| Total marks for the question paper | <u>30 -Marks</u> |

Paper III. - Part II – Design**Learning Outcomes:**

Examine the candidate's skills in designing and decorating products and decorations to suit the various application needs that arise in daily life.

It appears that a majority of candidates choose Part II in answering Paper III. Most of them are innovative designers with a theoretical understanding and many are trying to create designs without realizing it. However, the candidates' creations reflect the scale of the skills they have acquired. They need to understand the extent of the skills they have demonstrated through the criteria and award points.

Scoring criteria

1. Ability to design innovatively to suit the design work relevant to the topic.	-05 Marks
2. Suitable for consumer needs and industry-friendly	-05 Marks
3. Ability to use line shapes meaningfully	-05 Marks
4. Ability to select and use appropriate colors	-05 Marks
5. The elegance, the charm and the success of the design	-05 Marks

Paper III. - Part III – Graphic Art

Learning Outcomes:

Examine of the candidate's skills in communication work, printing process and graphic design and design to suit commercial needs.

This is the new section added to the G.C.E. Ordinary Level Question Paper. The student answers this section using the techniques and skills mastered in the classroom on the subject of graphic art. Marks should be awarded based on the skills they have demonstrated in the evaluation and the creativity of the publication.

Scoring criteria

1. Ability to design with novelty to suit the topic	-05 Marks
2. Suitable for commercial and communication needs and suitable for printing.	- 05 Marks
3. Ability to use line shapes meaningfully	-05 Marks

During the re-scrutiny of the answer scripts, there were many instances where serious errors were reported by some inspectors. It will be the responsibility of investigators to prevent such mishaps.

Among the errors so reported.....

- Marked as incorrect answer (p) as answer and correct answer (d) as answer.
- Some answers may have been left unmarked.
- Inability to understand the marks used in scoring.
- Errors in scoring.
- Failure to evaluate practical answer sheets 2 and 3 properly.
- Awarding marks irrespective of the criteria of 2, 3 papers.
- Failure to use the Assistant Examiner's code number and short signature stating that it has been inspected a second time.
- Numbers are not used clearly.

- Awarding a low mark to the answer sheets which have exhibited very high merit and a high mark to some pictures which have not exhibited merit.
- Deliberately attempting to award a pass or an award, exceeding the mark on the question paper.
- Mistakes made in listing the final score on the front page.
- The last mark of each sheet is not shown in a circle.

Such errors can be pointed out. The most serious of these errors is the overestimation and underestimation of the II and III papers. Therefore, there are many instances where the score goes up and down in the re-survey. It is the sole responsibility of all investigators to avoid such incidents altogether.

Taking all the above factors into consideration, it will be a national mission for the children of the country to contribute to an effective evaluation by performing the assessments efficiently and systematically preparing the score sheets.
